DETAILED ACTION

Allowable Subject Matter

Claims 1, 4-15, 18-38, 40-53, 55-59, 61-66, 68-73, 76-80 and 83-96 are allowed.

Referring to all of the independent claims, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including "determining a keyword match score for each programming event having a keyword match, wherein a keyword match is a match of the at least one of descriptive data and keyword data of the programming event metadata and a keyword of the at least one viewer profile", as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Specifically, Ismail teaches ranking category data using various types of information (including keyword data), but when the actual ranking process is executed (see Column 10, Lines 15-27 of Ismail), the keyword used is one specified by the user input, not one contained in the incoming metadata, therefore, there is no keyword data being used from a viewer profile, only data specified by the user. Further, Weissman does not teach using a keyword in a viewer profile to provide the match score, and instead uses an importance factor, which is a numerical value.
